

Thin Wall 70 Bar Riser Tube

Keeping the art of distribution simple

Thin Wall 70 Bar Riser Tube

Practical, user friendly, Health & Safety compliant AND 40% lighter!

Shawston are recognised as the leading fire protection supplier in the UK and now supply BOTH galvanised and red oxide finish Thin Wall 70 Bar Riser Tube. Available in sizes 65mm to 150mm and 3m lengths as standard, Shawston can supply any size of order from vast stock in 5 nationwide depots.

Features & Benefits include:

- **Higher grade steel and manufacturing process resulting in test certified pressures up to 70 Bar**
- **Suitable for dry and wet riser installations and also normal fire sprinkler applications too**
- **No need to use traditional and substantially more expensive, "heavy weight" tube**
- **Approximately 40% lighter**
 - » **Much faster installation times = huge labour savings**
 - » **Compliant with Health & Safety guidelines for reduced weights for handballing tubes on-site and in confined voids**
 - » **Thinner wall thickness = less metal = cheaper to produce = competitive sales prices!**
- **All tube is pre-roll grooved, tested to Victaulic standards and fully audited**
 - » **No on-site grooving of standard lengths**
 - » **Much faster installation time**
- **Available in all Shawston depots - 5 delivery or collection points available**
- **Next day UK wide delivery service including timed delivery slots**
- **Major projects can be stage managed with lead-times, fixed prices and labelled call-offs**

Thin Wall 70 Bar Riser Tube

Shawston Riser Tubes are fully test certified, copies can be provided to customers and their clients. All tubes are pre-grooved at both ends saving you both installation time AND on-site grooving costs. Working with the premium brand (Victaulic), the Shawston Thin Wall Riser Tube pre-groove is audited and rigorously tested in-house assuring the customer that all their QS necessities are met.

At **40% lighter as well as being less expensive** than the usual “heavy” steel riser tube, the Shawston Thin Wall Riser Tube allows a single operative to carry a 3m length of thin wall riser pipe, whereas two are required for traditional heavy weight. The substantial weight saving and ease of manual handling also means contractors can collect tube and fit approximately 40% more tube volume in their panel van - meaning more time on-site installing and less time having to remove or to cut a shift short.

Don't forget: Shawston also carry the full range of dry and wet riser cabinets, valves and accessories making Shawston **THE ONLY** national multi depot supplier of dry and wet riser packages in the UK.

With our network of 5 strategically placed nationwide depots and company owned extensive 22 strong vehicle fleet, you can be assured that Shawston will deliver your ex-stock goods in full and on time. Collection is also available if you prefer. Shawston are able to meet stringent on-site timed delivery slots.

Prices and terms & conditions of sale can be discussed with your usual Shawston contact, or by or by calling any of the Shawston depots.
