

Viega Press Systems

Keeping the art of distribution simple

Viega Press Systems

As the largest specialist provider of traditional steel tube, fittings, valves and pipe supports we supply our vast product range into a wide variety of major construction projects. Working alongside key suppliers we always ensure our products are of the highest quality and continue to have an innovative edge. Shawston are keen on making the art of distribution simple, that's why we have partnered with global market leader Viega who are continuously at the forefront of product refinement and development.

We now stock four innovative Viega products in our mechanical services product range. Quality is everything. Without quality, everything means nothing.

Viega Profipress

We all know time is money when installing. Why solder when you can press instead? Viega's Profipress is the complete system to make installations quicker, safer, and easier. Available in dimensions from 12mm to 108mm, Profipress flow-optimised fittings feature a double-press profile for mechanical strength, plus Viega's SC-Contur technology - a dedicated leakpath that immediately identifies any unpressed connections during a pressure test.

[View technical specifications.](#)

Viega Smartpress

An advanced multilayer piping system with minimal pressure loss, that's Viega Smartpress. The flexible pipe can be quickly and easily prepared straight off the coil enabling connection work to be efficiently conducted 'on the floor' and - with large dimensions up to 63mm - they are perfectly suited for use in riser and distribution pipes.

[View technical specifications.](#)

Viega Sanpress Inox

An industry leading stainless-steel system not just for top quality drinking water installations, but also for industrial cooling and process water systems too. The Sanpress Inox system uses top quality materials throughout, created by a combination of stainless-steel connectors with stainless steel pipes 1.4521 and 1.4401 and is available in dimensions 15mm to 108mm.

[View technical specifications.](#)

Viega Megapress & Megapress S

Using cold press connecting technology resulting in faster, safer and more efficient connections that are both durable and safe. This technology can be used to connect both thick walled steel and boiler pipes in dimensions from 3/8 up to 2 inches and 3/8 up to 4 inches for the S and S XL range. The connectors are designed to work with galvanised, painted and coated pipe and the range includes adapters, flanges and valves to provide maximum flexibility.

10 Reasons Why People Choose Shawston

You often suffer from multiple deliveries to complete your order.

You spend time waiting for other stockist “feeder hubs” to deliver to a local branch before it arrives to your site.

Your engineers and supervisors are losing valuable time on-site chasing suppliers.

Your current supplier uses too many third-party carriers and you are suffering with late/no delivery and inadequate paperwork.

Your current supplier neither has the knowledge nor deep stocks of Mechanical Services, Fire Sprinkler and Dry/Wet Riser products.

You are fed up speaking to customer service contacts who don't seem to care. They don't respect your customer needs and your on-site pressure.

Your current supplier cannot deliver your order on time and in full the very next day.

You're being regularly let down by poor customer service.

You want to speak to an experienced and dedicated team.

You want to speak directly to the business owner.
